

Introducing the 2022 Energy Smart Step-Down Bonus

The Energy Smart program will implement a Step-Down Bonus in 2022, starting January 1. This new bonus structure provides different incentive bonus levels throughout the year for energy efficiency upgrades to your buildings or facilities. Don't wait to apply. Submit your application early to lock in more money for your project.

How It Works

- 1.** Bonus incentive rate is based on the quarter your application is approved.*
- 2.** Once your application is approved, you have until Dec. 31, 2022, to complete the project.
- 3.** Don't wait. Lock in your higher bonus rate and get your share of the \$6.3M in available incentives from Energy Smart for 2022.

*Bonus rate does not apply to New Construction, Retro-commissioning, Small Business Direct Install and Demand Response projects.
